Classic Blackjack

Harken back to the days of traditional card-game gambling with Microgaming's Classic Blackjack online table casino game. With no frills, fuss or extraneous features, the seasoned Blackjack player can concentrate on playing the game in its original form, echoing the antique French Pontoon. This is a single hand game playing from a standard 52-card which is shuffled before each game.

As with any Blackjack game, the objective is to beat the dealer's hand by either getting a higher hand, without exceeding 21, or by the dealer's hand going bust –i.e., if the dealer's hand exceeds 21. The dealer may not peak under, and always hits a soft 17. The player may use a 10 or an Ace and may draw to split aces. No doubles are allowed after hand splits, and doubles may be made on 9, 10 and 11 only.

Not only does this virtual casino table game go back to its authentic roots, but the improved realism of the table imagery graphics and the sound effects complete the authenticity and genuine look and feel of a sophisticated, classic Blackjack table in the European casino style, making you feel as if you have just stepped into one of the world's finest gambling saloons, adding to your gaming experience that special touch of class and culture.

Bonus Blackjack

Introducing Bonus Blackjack online casino table game, an American-style Hole Card game with all the familiar flavor of Vegas Downtown Blackjack in that it is played with Two standard 52-card decks and plays according to '3-split/4-hand' splitting rules, but adds a touch of uniqueness and gaming variety that only Microgaming™ provides, by introducing the side-bet option to this table gambling sub-genre, which features a highly generous odds-payout table. This classic blackjack variation consists of both a base game and an optional bonus Side Bet or 'insurance' game, each with its own set of gaming rules and modes of operation. The Base Game rules are as follows: firstly, the dealer 'peaks' on Ace cards and 'face' cards (i.e., King, Queen and Jack, each of which have a value of 10 in the game), and must hit on Soft 17 cards, where the Ace in his hand will be considered as having a value of 1, not 11 (only for the dealer).

The bonus game rules and Odds Table are as follows: if a player's first two cards are suited, he or she is paid out to the odds of 5-2. If the first two cards are a suited Jack and Ace, he or she is paid out to the odds of 25-1. If the first two cards are a Jack of Spades and an Ace of Spades, the player is paid out on the maximum odds of 50-1 – a truly generous and highly profitable proposition indeed! Lastly, the outcome of the side bet is not dependent on the dealer's hand OR on whether or not the player wins the Blackjack hand –this makes your winning chances almost certain –but you'll need to take a gamble on this sophisticated online table casino game to stand a chance, and discover a level of playability, enjoyment, tactical demand and dynamism which could rival any land-based blackjack table.

European Blackjack

The modern version of Blackjack is considered the most widely played casino table game in the world, affording both the aristocrat and the common citizen hours of enjoyment and testing of skill. In tribute to this classic card game rich in European heritage and traditional, online gaming software developers Microgaming™ have developed a table game that stays faithful to its traditional European heritage.

European Blackjack is a classic single-hand Blackjack game that plays according to the traditional European gaming rules. Players play from a single standard 52 card deck which is shuffled before each game. The aim of the game, as with all traditional Blackjack games, is to beat the Dealer's hand without exceeding the numerical value of 21, or by the Dealer's hand exceeding 21 (i.e., "Going Bust"). A card combination of a non-split Ace and a 10-value card (such as 10, Jack, Queen and King) is considered to be a Blackjack hand, which is the winning hand of the game and pays out 3:2 on the player's bet. Splitting and Doubling Down of one's hand are only allowed under specific conditions, and a split Ace card with a 10-value is only considered 21, not Blackjack. Players may also make an optional Insurance side just in case the Dealer's upturned Hole card turns out to be an Ace, which consists of half of the player's standard bet and pays out 2:1, making up for a portion of one's losses in case the Dealer has a Blackjack hand. Continue in the tradition of this game's noble European history, celebrate in the sophisticated simplicity of its gaming roots. There is no frivolity, no garish flush, just pure, simple, traditional European Blackjack.

Spanish Blackjack

Spanish Blackjack smolders with great gaming opportunities, and offers you a variety of options to make your gaming a whole lot more entertaining. Spanish Blackjack is a take on the original game but slightly different from Blackjack as you know it, as it encompasses 8 decks of cards, but it is not played with the normal 52 deck cards, but instead with 48 cards, as the 4 tens are removed from each deck in Spanish Blackjack. The only 10's left in the pack are the face cards (J, Q, K).

Your aim is to beat the Dealer, either by getting a higher valued hand (closer to 21) or by the Dealer's hand going bust (going over 21). You want to do this with as few cards as you can possibly manage. So if you can do it within 2 cards – brilliant! Spanish Blackjack allows opportunities for you to stretch your Blackjack skills. It presents the prospects of building up unique card combinations and gives you endless opportunities to win.

The game is fast paced and, although you are playing only one hand at a time, you won't have time to blink. You need to build your strategy and challenge yourself as to when to hit or when to run. The rewards though can be huge.

Vegas Downtown Blackjack

Vegas Downtown Blackjack is a standard Blackjack game with slight differences from some other variations of the same game. It's a game that combines skill and chance, and a game that can bring you hours of entertainment. Vegas Downtown Blackjack is played with two regular decks of 52 cards which are re-shuffled between rounds.

You can Split and Re-Split twice. You can Double any two cards after a Split. The Dealer hits on soft 17. As this game is an American Hole Card Game, the Dealer is allowed to peek for Blackjack if he has an Ace or Ten Value Card Showing. If the Dealer has Blackjack, then the game is over and the Dealer wins. There is no Surrender offered. Insurance bets are allowed, but you can't take insurance after a Split or a Double Bet. It's always better to play the game, because taking Insurance could let you miss out on some great hands. However, if you like to play it safe, then this option is available for you. Blackjack pays 3:2 (if you bet 10 credits and you win, then you would get 25 credits as your prize).

The odds are slightly more in the favour of the player with Vegas Downtown Blackjack. The fact that the game is played with two packs of cards, instead of 4 or 6 makes a difference in that the player gets a slightly better advantage because the house edge is lowered. Enjoy a trip downtown with Vegas Downtown Blackjack.

This is an American Hole Card game, which means that if the Dealer is dealt an Ace or ten-value card, he can peek. If he has Blackjack, the game is over and he wins. Big Five Blackjack Gold

Hear the roar of the wild with Big Five Blackjack Gold –Microgaming's™ latest installment to its already formidable portfolio of extensive video table games! This game will have you staring down the mouth of the beast with 5 standard 52-card decks from which to play. You'll be able to split your hands, double-down, and even opt for a late surrender on certain conditions. This Viper software-powered virtual blackjack table game features an Expert mode with an Autoplay function for a high standard of game-play, whereby you are presented with a built-in strategy card that you are able to customize and automatically apply. Because each hand you play is automatically recorded, you are able to review each previous hand played during real-time.

The betting range is from \$/€/£ 1.00 to 200.00, and getting the Blackjack hand pays you out 3-2. Blackjack beats any hand to the value of 21, and the dealer must hit on a Soft 17 hand. The jungle may be wild but it too has laws by which you must abide. This online casino table game has *four* such rules, namely: (a) Late Surrender Rules: Big Five Blackjack Gold does offer players a Late Surrender option, i.e., to surrender half of one's original bet so as to avoid playing out the rest of a potentially losing hand, but this option is withheld if the dealer shows an Ace; (b) Splitting Rules: You may split your hand up to 3 times to make 4 hands, and a pair of Aces may only be split once. Secondly, a split pair of Aces with an additional drawn card to the value of 10 is considered to be 21, not Blackjack.

Thirdly, Aces may only be split once in the duration for the game, and once an additional card is dealt to you, that hand must stand; (c) Double Down Rules: Firstly, you are allowed to double-down your hand on any first two cards, the bet of which will be considered equal to your original bet. You may also double-down your hand after a split – this provides your hand with extra winning advantage.

Online Blackjack

The only time you may not double-down your hand is if you have a Blackjack. Lastly, there is (d) Insurance Bet Rules: This game offers you the option of making an Insurance side-bet. Since the dealer's Hole card is Face Up in this game, you will be able to see whether or not the dealer holds an ace.

That said, the Insurance bet is offered in case the dealer ends up having a Blackjack –in which case your bet is paid out 2:1. If it turns out that the dealer does not have Blackjack, you lose the value of your insurance bet. Furthermore, you may not place an insurance bet for any second hands following a Split or a Double-Down. The laws of the jungle are simple, play by them and you will reach the top of the pack. Play Big Five Blackjack Gold and get a chance to take home more than just a trophy for your wall.

Pontoon Gold

Pontoon Gold is played with eight regular decks of 52 cards. This is a single hand game, which can be most rewarding. If your hand has an Ace and a ten-value card, then you have Pontoon. If you hold 5 cards and you have not exceeded 21 then you win. This is called If you get "Pontoon" then you are paid out 2:1. A Five Card-trick pays out 2:1, and Pontoon, as well offers a win of 2:1. If you win with Pontoon, then you always beat a five card Trick. If you win with a normal win, then you are paid out 1:1.

The game is a tie, and then the Dealer wins. The Dealer stands on all 17s. You can buy on 2, 3 or 4 cards once per hand. Minimum bet is 1.00 and the maximum bet is 2.00. You cannot take more cards after you have split Aces. Pontoon Gold sticks with the rules of the American Hole Card Game, where the Dealer is allowed to peek to see if he has Blackjack. If the Dealer has Blackjack then he wins. If your cards have a value of less than 15 and they are not a 5-card trick, then you must Twist. Twisting is simply requesting another card from the shoe because your hand is not strong enough to beat the Dealer. You can split two cards with the same value.

Your one hand becomes two hands and you bet an equal amount on the second hand you are playing. Pontoon Gold is a most exciting game, which will bring you loads of excitement, tons of entertainment and stacks of gold.
