## American Roulette

Try your luck against the wheel of fortune with the American Roulette virtual table game. This online casino game is the latest table-game addition to the Microgaming portfolio and is modeled on the widely popular American Roulette tables you would find in any high-class Las Vegas casino where the stakes are high and the Double-Zero is king! The table is divided into the traditional Red and Black colors with 36 numbers on the table grid, as well as Single Zero and the All-American Double-Zero as the house pockets.

The game offers special wagers known as “call bets”, and give the player the choice between a Regular and Expert gaming mode which offers standard and advanced playing features respectively. The conventional, land-based casino look and feel of the graphics, as well as the inclusion of the Double Zero to the roulette wheel, is designed to appeal to players within a specifically American demographic or to players who enjoy the American-style casino games.

The game requires you to call a number or a set of numbers and /or a color (either Red or Black), whereby a small ball is rolled onto the counter-spinning roulette wheel. If your ball lands on the number(s) and color you called, you can call yourself a winner! The highest odds of this game are a straight bet of 35:1, and the maximum wager size is 20.00.

## European Roulette

Numbers: 0 to 36 | Chip Sizes: \$1.00 to \$50.00 | Chip Amount: Mixed chip pile | Highest Payout: 35:1 on Straight Up Bet

Crazy Vegas Casino transports players back to the decadent sophistication of 18th Century France, when Blaise Pascal's innovative new invention, the Perpetual Motion Machine would change the face of gambling for generations to come! Introducing European Roulette, the sophisticated betting game of chance where the fate of dreams hangs on the landing position of a little gaming ball!

As per European tradition, this online casino Roulette game features only a single zero, with a table of numbers ranging from 0 to 36 (hence 37 numbers in total). The aim of the game is to bet on a number or set of numbers and an accompanying colour from a range of Red, Black and Green (for 0 only). Once the bets are placed on the table, a small ball is released onto the grand wood and gold-plated spinning Roulette Wheel, in the opposite direction to which the wheel is spinning. If the ball lands on the number and accompanying colour that you bet on, you win! You could win a payout amount of up to 35:1 if you win on a Straight-Up bet: this is when you bet on a single number and accompanying colour, whereby your chips are placed entirely in the middle of a particular number square.

The chip value size ranges from \$1.00 to \$50.00 per chip, and chip amounts appear in a mixed pile, so there is no limit on how much you can win!

## European Roulette Gold

**Numbers: 0 to 36 | Chip Sizes: \$1.00 to \$50.00 | Chip Amount: Mixed chip pile | Highest Payout: 35:1 on Straight Up Bet**

European Roulette Gold plays according to all the traditional European Roulette rules that you have encountered in the original European Roulette game –i.e., bet on a number or group of numbers from 0 to 36 with the accompanying colour of black or red (the colour green accompanies the zero only) on the Roulette table and launch the ball to spin counter to the spin direction of the Roulette wheel. If the ball lands on a wheel pocket representing your bet, you win! If you win on a single number-colour combination bet, called a Straight Up Bet, you could up to 35 times your original bet.

But this game earns its Gold title with a very special twist: there are not one but three different kinds of bets that you can make when playing on European Roulette Gold:

**Regular Bets:** These consist of Inside Bets, whereby you bet on any number on the table, and Outside bets, which consist of bets placed outside of the regular table layout

**Neighbor Bets:** This when you bet on the two numbers on either side of your single Straight Up bet, amounting to five numbers and a minimum of five chips altogether.

**Call Bets:** This is when a specific group of numbers on the Roulette table is bet upon simultaneously. There are up to 35 different Call Bets from which you can choose.

## French Roulette

Numbers: 0 to 36 | Chip Sizes: \$1.00 to \$50.00 | Chip Amount: Mixed chip pile | Highest Payout: 35:1 on Straight Up Bet

Join the Microgaming™ French Revolution and play French Roulette –the ultimate in classic European-style online casino Roulette gaming! Travel back in time to the turbulent, decadent, sophisticated, opulent and revolutionary era of 18th century France, when Mary Antoinette said "Let them eat cake!", when hordes of rioters stormed the walls of the Bastille and marched on Versailles in the name of the Republique, when Vincent de Gournay declared "*Laissez faire et laissez passer!*", and the inventor Blaise Pascal created the Perpetual Motion machine –an invention that would forever revolutionize the world of gambling!

The conventional green felt table features numbers 1 to 36, as well as a single Zero (0), as per the European roulette convention, which are divided into two parts constituting the two different Inside Bets, namely : 1) Manqué (numbers 1-18), (2)Passé (19-36); and two Outside Bets: Impair (odd numbers) and Pair(even numbers). The game features three colours, Red and Black-which correspond to the numbers 1-36, and Green, which corresponds exclusively to the Zero. The aim of the game is to correctly predict the number and corresponding colour that the counter-spinning Roulette ball will land on, on the spinning Roulette Wheel. The highest payout goes to a correctly predicted Straight Up bet, which consists of betting on a single number-colour combination, and pays out 35:1 on your bet. That's a liberating win of \$1750 per chip straight into your bank account! Vive le Revolution! Vive le French Roulette!

## Roulette Royale

Roulette Royale is based on Standard European Roulette as there is only one zero (0) in the game. Since the game does not have the American Style of using a double zero (00) there are more opportunities for you to win. You need to make a bet on a number or a group of numbers or you can cover various numbers at the same time. You can also bet on the colour that you think the Roulette ball will stop on. You want to bet on the winning number because this is what will wheel in the prizes for you. The great news for Roulette lovers is that this is not your average game of Roulette. It offers you a majestic gift in the form of being a Progressive Jackpot too. The Jackpot builds up over a period and many players would be contributing to it as time goes by.

One credit per game is dedicated to the Jackpot, and it can become huge. To win the Jackpot, you need to get 5 hits on the same number. There are also smaller Jackpot amounts that you win for winning fewer numbers in consecutive play. If you win the same number four times in a row, you can still win a magnificent 3000.

## Premier Roulette

Premiere Roulette is based on European Roulette where the numbers are based with a single zero, numbered from 0-36. The game is in total Realistic 3D, and is photo-perfect, giving you the look and feel of being in the actual casino, and not playing virtually. In addition, the game offers various options that allow you to personalize your game-play and make it into your very own gaming paradise. You can play in "expert" mode as well as using the "edit layout" option where you can save up to five of your favourite betting options in order to speed up your betting process. You can also speed up the wheel to make your games go even faster with the "Turbo" feature.

Another great option that is available is that you can change colours of the background and the Roulette Wheel to ones that you prefer. If you want an up close and personal view of the game, you have the option of Zooming in on the Roulette Wheel so you can see the numbers as close as if you were right at the Roulette Table. The game of Premiere Roulette is as easy to play, as it is beautiful to play on. As with any usual game of Roulette, you can bet on a single number or colour, or multiple numbers and colours. You can make single or multiple bets. Your winnings are all dependant on the fall of the ball and you could be the Premiere Roulette-player of the season. You are going to love the look and feel of this exciting game as well as the winnings that you are going to walk away with.

## Multi-Wheel Roulette Gold

Multi-Wheel Roulette Gold offers you more ways to win than ever before! With eight Roulette wheels decking the tables, you can play an octet of games and stand the chance of winning up to eight times simultaneously. This exciting Table Game offers you a betting range of between 1.00 and 50.00. You can place your bets on any of the usual betting options, from Straight Up single number bets to Row bets and Split Row bets, with many options in between. Based on French Roulette, there is only one zero on the wheel, which increases your betting odds and your winning potential. Every Roulette wheel has a previous wins display, which depicts the last winning numbers and a “Win Window.” This shows you how much you have won on that particular wheel. Multi-Wheel Roulette is just like normal Roulette, except that it offers you more chances to win more of the time. You can play more games in the same amount of time that you would have played your normal rounds of Roulette. You can also set the game to play out your preferences by itself with the AutoPlay capability. You can use the Edit Layout feature to change the table characteristics and create the perfect table for your gaming. The Race Track on the right side of the screen is also an additional feature that gives you a quick reference at a glance and allows you to determine quickly what wagers you wish to place. Start by placing your bets and wheeling in the winnings with this amazing golden game.
